Toulouse, France
Mobility : All of France

LANGUAGES

French - Native
English – B2 level

SKILLS

Languages : Python, C, C++
SolidWorks, Raylib, Miro
Embedded systems, Electronics, Fluid mechanics

INTERESTS

Fencing - Departmental champion
E-Sport : – Top 150 EU Overwatch
– Top 500 World Fortnite
Military preparation : Intensive physical training (swimming, running, strength training)
Warhammer painting

ENGINEERING STUDENT ENSEEIHT (3EA) – LOOKING FOR A 1ST-YEAR INTERNSHIP

EXECUTION / DISCOVERY INTERNSHIP | INDUSTRY AND DEFENCE | 2 MONTHS | SUMMER 2027

PROFILE

Passionate about Defence and Aerospace, I am looking for an immersion internship in an industrial environment. My goal is to experience the reality of the field and of production before moving towards systems engineering

EDUCATION

[2026]
ENSEEIHT Toulouse | Electronics, Electrical Engineering and Automation (3EA)
• Algorithms and programming, computer architecture, logic systems, electrical circuits, metrology, signal processing and control

[2024-2026]
Preparatory classes (CPGE) - Lycée Marcelin Berthelot | Saint-Maur-des-Fossés
*Scientific preparatory classes PCSI then PC**
• [Intensive training in mathematics, physics, chemistry and computer science]

[2021-2024]
Lycée Jean Rostand | Chantilly
French baccalauréat – Mathematics, Physics-Chemistry, Advanced mathematics option
Highest honours (Très Bien)

PROJECTS AND EXPERIENCE

[2025-2026]
Aerodynamic optimisation of an aircraft | CPGE research project (TIPE)
• Manufacturing of prototypes by 3D printing
• Study of a flapped wing profile to compare several aerodynamic configurations
• Closed-loop system able to adjust the flap to optimise the lift-to-drag ratio

[2026]
Development of a 2D video game in C | Ongoing personal project
• Creation of an interactive open world
• Programming with the Raylib graphics library

[2025-2026]
World-Building | Personal project
• Complete structuring of a narrative universe
• Foundation for starting to write novels
